

IE 1171: AI FOR SOCIAL GOOD

Instructor: Dr. Amin Rahimian
Thursdays 6–8:30 pm at 158 Benedum Hall

Course Overview:

- Learn AI and machine learning through new LLM-integrated labs: a guided core plus optional deep dives. Pair short readings and real-data projects with AI-assisted problem framing, coding, model auditing, output verification, and agentic GitHub workflows.

- Course project using real data to develop and evaluate an AI/ML model, discuss findings and societal implications.

Context:
Explore how AI can improve decisions while raising questions of fairness, bias, equity, ethics, privacy, and transparency.

Students from all disciplines interested in AI and social impact are encouraged to enroll!

Note: Any Statistics course can serve as a prerequisite for this course
